#### Soberanes Fire Weather Forecast

**FORECAST NO: 3** 

PREDICTION FOR: 0700 Tue-0700 Wed

**UNIT: CA-BEU** 

SHIFT DATE: 7/26-7/27

NAME OF FIRE: Soberanes

TIME AND DATE

Incident Meteorologist- Ryan Walbrun

**FORECAST ISSUED:** 1900 7/25/16

**NWS-Bay Area** 

WEATHER DISCUSSION: Marine layer will compress to between 1000 and 1500 feet as high pressure builds over the area leading to a warming and drying trend above the marine layer. Surface winds will remain light over the fire area today with a general southwest wind. The light winds and strengthening inversion will likely lead to heavy smoke over the fire area along with the Carmel Valley helibase and nearby airports. In addition a shallow fog/cloud layer will persist along Highway 1. Main concern for night operations will be a lowering marine layer down to around 1000 feet with rapidly drying humidity values for the ridgelines. Night operations needs to be especially aware of these low night time humidity and associated fire behavior. General trend through midweek will be continued warming and drying with a shallow marine layer.

#### WEATHER FORECAST FOR Tuesday:

**WEATHER:** Fog and low clouds on the coast otherwise areas of smoke.

TEMPERATURES: 3-6 degrees warmer. 84-94 above 1500 feet. 68-78 along Hwy 1 in Div X/Z.

**HUMIDITY:** Afternoon minimums 13-21% above 1500 feet Branch I and II. 40-55% Div X/Z

20 FT WINDS:

RIDGETOP - Southwest 4-8 mph afternoon gusts 12-15 mph in Div C and M.

**SLOPE/VALLEY** - Becoming upcanyon 2-5 mph afternoon gusts 8-10 mph.

Marine Layer: Around 1200 feet along Hwy 1 but little impact for most of the inland Divisions.

#### WEATHER FORECAST FOR Tuesday Night:

WEATHER: Areas of smoke otherwise fog and low clouds Hwy 1 and below 1000 feet.

TEMPERATURES: 2-5 degrees warmer. 63-72 above 1500 feet. 53-57 along Hwy 1 in Div X/Z.

HUMIDITY: Poor recovery 15-25% above 1500 feet except locally 9-15% after midnight

above 2000 feet. Good recovery 80% lower slopes Div X/Z along the coast.

20 FT WINDS:

**RIDGETOP** – South to Southeast 3-6 mph.

**SLOPE/VALLEY** – Evening upcanyons 3-6 mph gusts 10-12 mph...becoming light overnight.

Marine Layer: Compressing to around 1000 feet or less overnight.

EXTENDED FORECAST: Warming trend Weds-Thu. Marine layer 1000 feet. Light winds and strong

inversion with heavy smoke impacts likely.

SAFETY INFORMATION: Smoke will likely impact air operations. Know your elevation and monitor RH and temperature changes as the marine layer compresses. Please take wx obs.

#### FIRE BEHAVIOR FORECAST

FORECAST NUMBER 2	TYPE OF FIRE WILDLAND
FIRE NAME SOBERANES	OPERATIONAL PERIOD 24 HOUR
DATE ISSUED 7/25/2016	TIME ISSUED 1900
UNIT SAN BENITO-MONTEREY AND LOS PADRES FOREST	SIGNED

#### **INPUTS**

WEATHER SUMMARY

WARMER AND DRYER THROUGH THE NEXT FEW DAYS, SEE IMET FORECAST.

#### **OUTPUTS**

**FIRE BEHAVIOR** 

**GENERAL** 

THIS AREA HAS LITTLE OR NO FIRE HISTORY SINCE THE 1954 DEVIL FIRE EXCEPT FOR THE 2008 BASIN COMPLEX TO THE SOUTH. WEATHER HAS MODERATED THE LAST FEW DAYS COMPARED TO THE INITIAL FIRE RUN ON DAY 1. HOWEVER THE WINDS HAVE CHANGED DIRECTION 90 DEGREES EACH DAY, FROM THE NORTH ON SATURDAY, WEST ON SUNDAY AND SOUTH ON MONDAY. FUELS ARE STILL IN EXTREMELY DESSICATED CONDITION ESPECIALLY LARGE DIAMETER DEAD FUELS DUE TO THE FIVE YEARS OF BELOW NORMAL RAINFALL ON THE CENTRAL COAST. DEAD FRACTION IN MOST STANDS HAS ALSO INCREASED DUE TO THE DROUGHT. SMOKE COVER HAS SHADED THE FUELS IN THE LAST DAY, LOWERING THE PROBABILITY OF IGNITION TO 40%. LIVE FUEL MOISTURES IN CHAMISE FUELS ARE APPROACHING CRITICAL LEVELS ALL ACROSS THE REGION.

FIRE BEHAVIOR IN THE CENTRAL COAST MOUNTAINS TENDS TO INCREASE AFTER MIDNIGHT DUE TO RELATIVE HUMIDITY BOTTOMING OUT ABOVE THE MARINE LAYER. INCREASED FIRE ACTIVITY MAY CONTINUE FOR SEVERAL HOURS. MOINTOR RH DURING NIGHT HOURS TO BE PREPARED.

#### SPECIFIC

#### **BRANCH I**

DIVISIONS A, C AND F

HEAVY BRUSH AND GRASS FUELS ON THESE DIVISIONS ARE VERY SENSITIVE TO SMALL CHANGES IN WIND AND SOLAR RADIATION. DEAD OAKS HAVE CONTRIBUTED TO FUEL LOADINGS ON THE GROUND. 1600 HOURS SEEMS TO BE A TRIGGER FOR INCREASED FIRE ACTIVITY EACH DAY.

#### BRANCH II

DIVISIONS K, M AND P

THE FIRE IS CREEPING THROUGH SURFACE FUELS WITH OCCASSIONAL ROLL-OUT DRIVEN UPHILL RUNS OR SLOPE REVERSAL RUNS THAT CAN INCLUDE SINGLE TREE OR SMALL GROUP TORCHING, HEAVY DOWNED FUELS EXIST IN THE DRAINAGES AND CAN RESULT IN HIGH INTENSITY BURNING EVEN WHEN BACKING. SHORT TO MEDIUM RANGE SPOTTING UP TO HALF MILE WILL OCCUR IN AREAS OF TORCHING.

#### **BRANCH IV**

DIVISION T, X AND Z

MOST OF THIS BRANCH HAS BEEN BELOW THE MARINE LAYER. MANY PLACES ON THESE DIVISIONS THE FIRE IS EITHER SMOLDERING OR HAS GONE OUT UNDER THE MARINE INFLUENCE. SOME AREAS SMOLDERING AT THE BOTTOM OF STEEP DRAINAGES STILL HAVE THE POTENTIAL OF A SLOPE REVERSAL RUN IF THE FIRE SPOTS ACROSS A DRAINAGE.

#### AIR OPERATIONS:

SMOKE WILL CONTINUE TO LIMIT AVIATION ACTIVITY DURING MOST OF THE DAY WITH A SHORT WINDOW IN THE LATE AFTER NOON. THE MARINE LAYER WILL BE MORE COMPRESSED SO THERE MAY BE OPPORTUNITY EARLIER AT THE HIGHER POINTS OF THE FIRE.

#### SAFETY

- ON 8/16/1939 JOSEPH CALANDRA DIED IN A BURNOVER ON BIXBY MOUNTAIN ON DIVISION P
- TREES ARE FALLING EVERY MINUTE ON MOST DIVISIONS WITH TREE COVER. MAKE SURE YOU ARE PREPARED TO DEAL WITH ESCAPE ROUTES COMPROMISED BY FALLEN TREES
- BOULDERS UNDERMINED BY FIRE PASSAGE ON STEEP SLOPES CAN FALL WITH NO WARNING.

## SAFETY MESSAGE SOBERANES

16-CA-BEU-003422 - July 26, 2016 - 0700 TO 0700

#### **FATIGUE** E CREWS ON THE ROAD and FIRELINE **Watch Out** Impacts situational awareness Impacts work performance Impacts general safety Traveling within the incident Mitigation Brief crews specific to the special instructions in 204 to divisional assignment N Implement the buddy system for monitoring E Schedule work/rest cycle based on workload and weather, intake Water and Food S Reduce speed, utilize headlights at all times, watch for wildlife and civilians **HEAVY EQUIPMENT** R DOZERS and MASTICATORS are ASSIGNED TO MUTIPLE DIVISIONS E **Watch Out** S Operators may have limited visibility Operations may cause rock and bolder roll out -Watch out! Maintain appropriate working distance. **Mitigation** Make sure that you have eye contact with operator before you approach. N Maintain high levels of situational awareness when working around heavy equipment S I **ROCKS AND BOULDERS** B CONTINUE TO BE A HAZARD ON THIS INCIDENT - NEAR MISSES REPORTED Watch Out - Be on the lookout for lose rocks and boulders Rocks may roll for great distances down slope Large rocks in roadways can get caught between 'duals' Lose gravel, rocks and boulders may end up in roadways

Mitigation - Maintain high level of situational awareness for rolling rock and boulders

Stop and check for rocks between dual tires before traveling on the highway
Listen for rolling rocks and boulders and 'yell out' to others around you.

· Watch out in areas with steep slopes

JACK PICCININI TEAM SAFETY OFFICER

## INCIDENT ACTION PLAN SAFETY ANALYSIS (ICS 215A)

1. Incident Name:	Soheranes		2 Incident	Number: 16-CA-BEU-003422				
1. moldent Hame.	Soberanes		z. incluent	Number: 16-CA-BEU-003422

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

EMERGENCY FREQUENCY	: CALCORD								777
LINE EMERGENCY:				INCIL	DENT REPORTI	NG PR	OCEL	DURES	

Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
  - Closest EMS resource
  - 2. Communications Unit
- Communications Unit contacts:
  - 1. Ground or Air ambulance as requested
  - 2. Operations
  - 3. Safety
  - 4. Medical Unit (916) 622-3371
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
  - A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

#### **INCIDENT BASE EMERGENCY:**

ICS 206

Contact Communications on CALCORD with patient complaint/symptoms and location. Communications will respond appropriate medical response.

- Communication contacts:
  - 1. Medical Unit
  - 2. Safety
  - Logistics
  - 4. Operations
  - 5. Crew Supervisor
  - 6. Comps/Claims

# Directions to Ground Support from Incident Base / ICP

- Highway 68 East
- Exit Reservation Rd
- Turn Left and follow Reservation Rd
- At Inter-Garrison Rd turn left
- At "T" intersection turn right (still Inter-Garrison Rd)
- Turn left onto 8th St
- Immediate right on A St
  - SIGNS ARE POSTED ALONG ROUTE

#### Fuel Driving Direction from ICP

- Take HWY 68w for 2.5 miles
- Turn Left on Corral De Tierra RD
- Use second entrance to access fuel

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. You can get further information about Penal Code Section 409.5(d) at <a href="http://www.leginfo.ca.gov/cgi-bin/displaycode?section=pen&group=00001-01000&file=403-420.1">http://www.leginfo.ca.gov/cgi-bin/displaycode?section=pen&group=00001-01000&file=403-420.1</a>

CAL FIRE SOCIAL MEDIA POLICY – When on a CAL FIRE incident you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can get further information about the CAL FIRE Social Media Policy at <a href="http://calfireweb.fire.ca.gov/library/handbooks/0600/0691.pdf">http://calfireweb.fire.ca.gov/library/handbooks/0600/0691.pdf</a>

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics. You can also send your photographs and videos to the following email <a href="mailto:Soberanesfire2016@gmail.com">Soberanesfire2016@gmail.com</a>

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

MAIL SERVICE – The Information Section will assist you in getting items mailed from the incident as well as receiving items whether it is letters or packages.

## **CAL FIRE**

## INCIDENT MANAGEMENT TEAM WATER USAGE PLAN

#### California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

#### Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- · Use of foams, gels and other water enhancers.
- · Evaluate need to mop up in excess of 200 feet from fireline

#### Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- · Use chemical treatments when available (Magchloride, Omni bind etc).
- · Consider use of tertiary or treated water (sp)

#### **Aviation Operations-**

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- · Maintain accountability of water used and locations of dip sites.
- · Evaluate need for interior bucket drops

#### **Private Water Supplies-**

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

#### Public/ Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- · Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

#### Management and Supervision-

- Use leaders intent and consider establishing Water Conservation as a Management Objective.
- Consider complexity of water use on incidents. Consider establishing a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- · Review this check list and brief daily.

## **INCIDENT MANAGEMENT TEAM WATER USAGE LOG**

UEST#	I.e., Strike Team	1110C, Acn	ne Water	Tenders	
WATER SOURCE LOCATION	Hydran t	Open source i.e. pond	Tan k	Gallons Used	Property Owner / Contact Number if known **
,					
Y	.16. = .8				

The intent of this document is intended to track, record and validated the amount of water used on a incident. It's not intended to review the performance of equipment using the water on an incident.

## TRAINING SPECIALIST MESSAGE

A Training Specialist is available for trainees on the incident.

All federal, state and local government agency trainees working on position task books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment. We are located with Check-In.

Bring your task book with you.

Training Specialist

Dennis Martin 707-479-8421 Jonathan White 562-324-1811

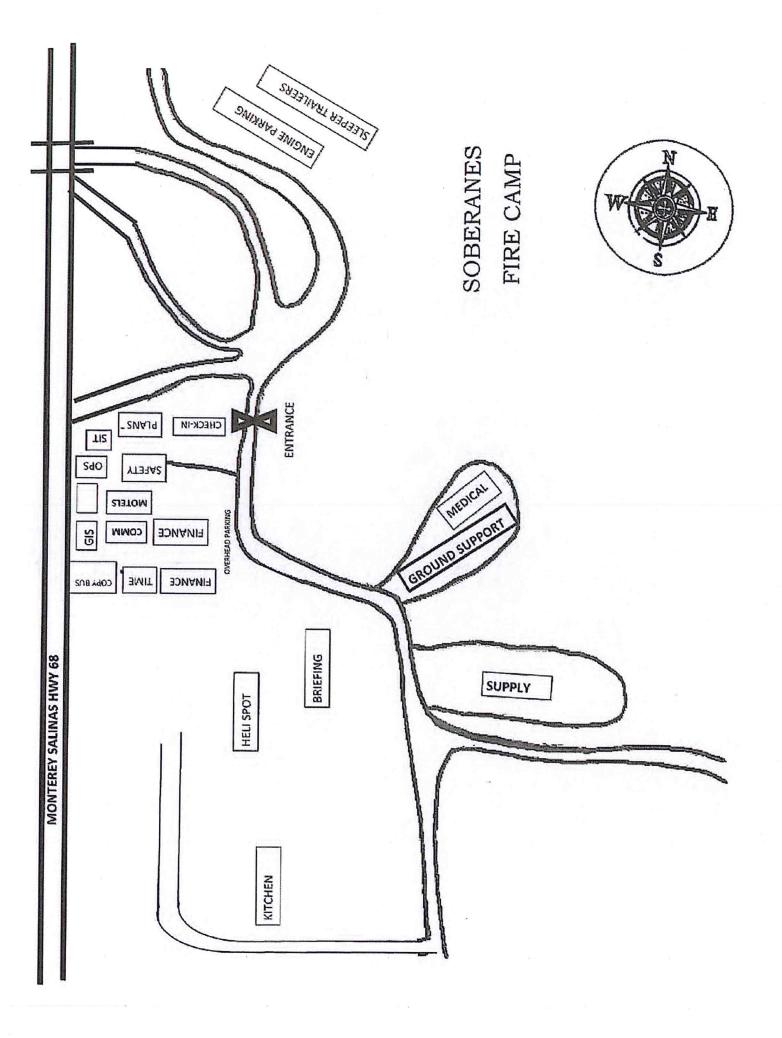

# Archaeological and Historical Sites Fireline Guidance for the Soberanes Incident Do not compromise safety for the protection and preservation of archaeological and historical sites. When feasible and prudent:

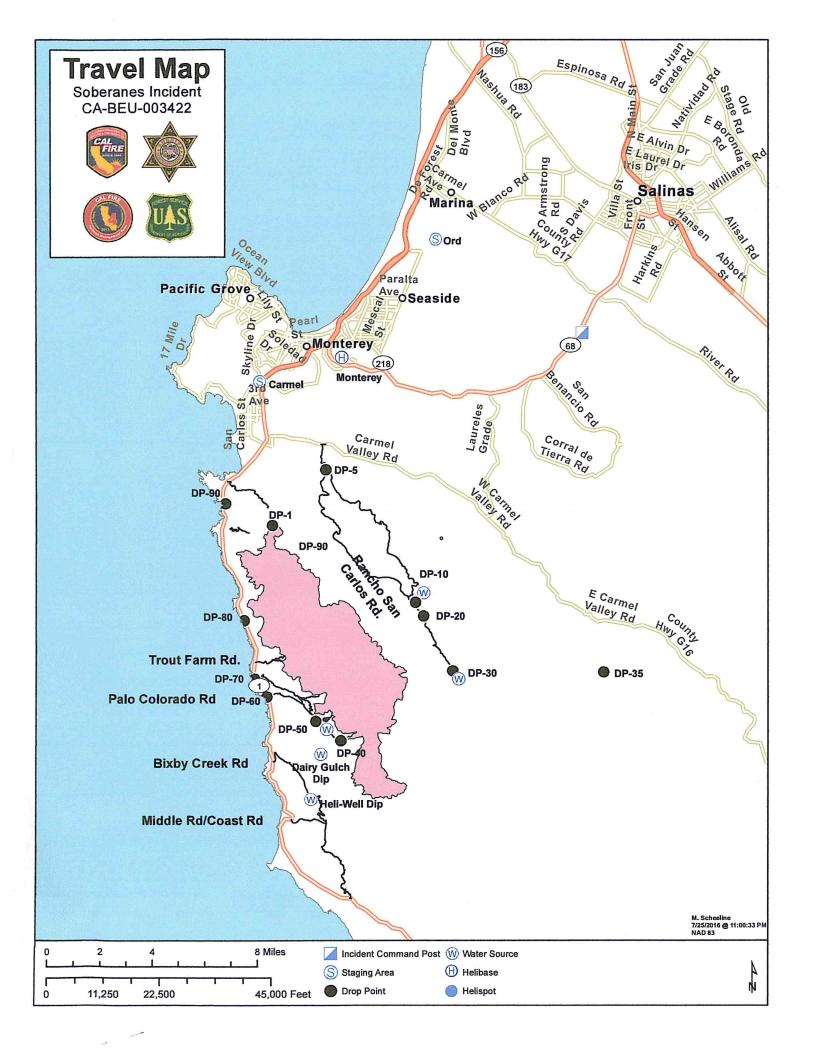

- 1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include temporary camps containing scatters of obsidian and/or chert flakes that often look like broken glass. More permanent village sites containing circular depressions (house pits), artifact scatters, and dark brownblack soils (midden). These typically occur on flats near sources of water, along ridgetops and saddles, and other such places suitable for camping. Historic sites include old wooden buildings, structures and corrals, rock foundations, wells, and debris scatters. These kinds of resources can be found in the same kinds of environmental settings as prehistoric camp sites.
- No archaeological or historical sites have yet been flagged. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment.
- If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
- Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
- 5. When a site is discovered, flag it for visibility and report its location to the Division Supervisor. If feasible, note locations of discovered resources on a map. Better yet, take a GPS reading. Leave information with the Plans Section so that the sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
- 6. If you encounter a burial or other human remains, cease work in that area immediately and contact the CAL FIRE Archaeologist. State law requires that CAL FIRE then contact the County Coroner, who will then determine if the remains are part of a crime scene. If the Coroner determines that the remains are Native American, State law requires the Coroner to contact the Native American Heritage Commission in Sacramento.

## FIRING OPERATION CHECKLIST
